

### ***Bakery Visit***

**Primary Actors:** Customer  
Baker

**Supporting Actors:** Ingredient Supplier  
Payment System

**Preconditions :** Bakery is open for business  
Bakery has fresh, ready made items available for sale  
Bakery has full/enough stock of ingredients for orders.  
Customer has valid method of payment

### ***Main Success Flow***

1. Customer visits bakery.
2. Menu and available ready made items are reviewed.
3. Customer makes a selection from Menu or ready made items.
4. Baker prepares menu item, or retrieves ready made item from display.
5. Baker packages item for customer.
6. Customer provides payment for item.
7. Baker process payment and provides item and receipt to customer.

### ***Alternate Flows***

- 2a. Customer does not find anything from menu or display that they want.
  - 2a1. Baker and Customer discuss modifying ingredients of an item, or Baker takes custom order to meet customers wants.
  - 2a2. Customer leaves without purchasing anything.
- 3a. Customer asks for an item that is unavailable.
  - 3a1. Ready made item requested is sold out for the day
  - 3a2. Bakers ingredient supply has run out and is not able to make the item requested while waiting for supply restock.
- 6a. Payment method is declined.
  - 6a1. Customer uses another form of payment (cash or other card).
  - 6a2. Customer is unable to provide payment and leaves without item.
- 6b. Payment system is out of order
  - 6b1. Only certain methods of payment are able to be accepted until repair is made
  - 6b2. Only customers able to meet specific payment methods can make purchases.
